Contents of the research proposal

The applications of students applying to the Doctoral Programme in Engineering should include a preliminary research proposal confirmed by the supervising professor.

The proposal should cover the following areas:

1. Background and topicality of study
2. Research topic and research questions
3. Research methods
4. Expected results and their transferability
5. Connections of the study to other research and doctoral studies
6. Schedule and financing
7. Publication plan
8. Bibliography

For more details, see, for instance, the enclosed guideline prepared by professor Kimmo Lapintie or ask your thesis supervisor for further instructions.
