Are you studying in Aalto University? Interested in completing your technical studies with Operations Management capabilities? Want to get an internship in high-growth companies in South-West Finland?

Apply now for the new HGO-program!

**HGO Program** focuses on companies in high-growth industries and their specific characters and challenges in the area of Operations Management. The program integrates university students and companies in South-West Finland. Connections with companies are made through course assignments, project work, and internship period in companies.

**Program structure includes:**
- Studies in the area of Operations and Service Management (OSM) based on an individual study plan
- An internship period in companies during May–August 2019
- Joint activities with companies

**Collaborating companies**
