Aalto University School of Chemical Engineering announces the scholarships of the Oiva Allan Pölkkynen foundation open for applications. The foundation opens the applications annually to the talented students in the Bachelor’s Programme in Chemical Engineering or Master's Programme in Chemical, Biochemical and Materials Engineering. The foundation grants up to three (3) scholarships of 1000 Eur. The scholarships granted will be paid in one installment. This scholarship can be granted only once for a student.

Priority is given to students studying the second, third or fourth study year. While granting the scholarships, good study success (GPA at least about 3, progress of studies about 55cr/year), and internationalization such as completed or planned exchange period abroad will be emphasized. It is possible to apply for the scholarship for completing a Master’s Thesis, if the thesis will be worked on without compensation or salary and no other scholarships have been granted for it.

You can apply online at the eAge system at https://eage.aalto.fi/?ff/EDU_520. (You will need to log in with your Aalto username and password). Applications must be submitted no later than 29.5.2017.

On behalf of the Scholarship committee of the School of Chemical Engineering
