Research fields of the Doctoral Programme in Science

The goal of the programme is to train doctors of physics, mathematics, biomedical engineering, computer science, and industrial engineering and management to serve in the academic world, public sector, and industry and commerce.

The departments responsible for the doctoral programme are: Department of Neuroscience and Biomedical Engineering, Department of Applied Physics, Department of Mathematics and Systems Analysis, Department of Computer Science, and Department of Industrial Engineering and Management. The research fields of the Doctoral Programme are based on the strong research tradition of the departments at Aalto University School of Science.

More information about Doctoral Programme in Science

Welcome event for new doctoral students autumn 2018
