

HAIC Talks: Science of Security: Authentication and Predictive Logical Models, 4.10.2019

Helsinki-Aalto Center for Information Security (HAIC) is a strategic initiative set up by Aalto University and the University of Helsinki to ensure excellence in information security research and education. HAIC provides **scholarships** for the top students specializing in information security, **travel grants** for local students going on exchange studies (starting in autumn 2019) and **industry contacts** by organizing various events where local infosec academia and industry can get together e.g. company visits and Secure Systems Demo Days.

For more information on HAIC visit the web page at <https://haic.fi/> and follow HAIC on Twitter (@haic_fi) and Facebook (facebook.com/haic.fi) to stay updated on news and coming events.

As part of HAIC's public outreach program, HAIC organizes **HAIC Talks**, a series of public lectures on contemporary topics in information security. The next HAIC Talk will be on October 4: "Science of Security: Authentication and Predictive Logical Models" given by Prof. Janne Lindqvist, Rutgers University, NJ, USA.

HAIC Talks are open to everyone and free of charge, but we ask you to register for the event at:
