

Credits for the students of the Aalto ENG from practical training

Student of the School of Engineering can get credits from practical training by working and taking practical training courses. The extent of the practical training is 1---5 cr at both Bachelor and Master level. Practical training courses will be placed in the elective studies.

The aim of the practical training, at the School of Engineering is to deepen the professional skills by doing major studies related, area specific practical engineering and/or research tasks under senior supervision. The tasks should be typical for the later M.Sc. work profiles.

Training Courses:

1. ENG-A1010 Training Passport (1 cr). Recommended to be taken during the first study year.
2. ENG-A2020 Work environment training (2 cr) or ENG-A2021 Work environment training Abroad (2 cr).
3. ENG-A3030 Advanced Training (2 cr.) or ENG-A3031 Advanced Training (2 cr).
4. ENG-E1010 Practical training (1-5 cr, master level).

At Master level studies, the course is ENG-E1010 Practical Training. Registration to the course is done in oodi.aalto.fi and the registration is open around the year. The practical training consists of a work placement at a suitable company or other work community. In addition to working, the student writes a reflective report and submits it to the course's MyCourses page.

More information about Practical Training is available at MyCourses page. Study advisors will also answer questions by email (advisors-eng@aalto.fi) or you can meet them in Otakaari 4, the room 102 during their reception hours that can be found here under the headline-Study advisors: <https://into.aalto.fi/display/fikandeng/Yhteystiedot>.

Welcome to the training courses!
