

Dean's incentive scholarship for good academic progress during the academic year 2018-2019 - Application period has started!

The dean distributes incentive scholarships of €500 for good academic progress during the academic year 2018-2019 to students of the School of Electrical Engineering. The scholarship application period has started and students who have appeared to meet the eligibility criteria in the beginning of August have been sent a personal link to the application form to their Aalto email address. Students who have completed studies that were not entered into the student information system as of the start of August due to, for instance, credit transfers, may ask for a personal link from the student services by sending an email to studies-elec@aalto.fi. The last day for submitting the application is 31 August 2019.

For further information about the scholarship award criteria, please see [Into](#) (the link directs you to the Into site of Master's Programme in Automation and Electrical Engineering, but the criteria applies to all students of the School of Electrical Engineering). Please note, that the third criteria: "The student has not paid tuition fee to Aalto University in the academic year in question" refers to the tuition fee that degree students who are citizens of countries outside the EU/EEA or Switzerland are generally required to pay. In other words, the criteria does not refer to the membership fee of the Aalto University student union (AYY).
