Getting started with your studies in January

Are you planning to start your studies in January?

If you are, follow the instructions about accepting the admission offer, enrolling at the university and amongst other things, activating the IT account. Follow your Aalto email!

In Aalto University an orientation is organised also in January. However, the schools highly recommend starting your studies towards a degree in September, if possible.

In the orientation you will receive information about relevant services for students and about starting studies in your new programme. In orientation you will get a tutor and an academic advisor.

Orientation for international students

Date: Friday 3 January 2020
