**Accounting**

**Code: 22**

**Responsible professor: Lasse Niemi**

The PhD Program in accounting at Aalto BIZ offers interdisciplinary training that develops the student’s skills in conducting both financial accounting and management accounting research. As an academic field, accounting is a multidisciplinary subject that focuses on understanding and studying the role of accounting information in the economy and society. Accounting draws from many fields and disciplines: Financial accounting is aligned with economics and finance more closely than ever before while organizational and sociological theories contribute to management accounting.

The PhD Programme in accounting at Aalto BIZ provides students with in-depth knowledge of current accounting research and research methodology with the aim of enabling the students to contribute to scientific knowledge in their field of study from an international perspective. In practice this goal translates into students’ ability to publish their research in high-quality academic accounting journals. To help achieve this goal, students work closely with accounting faculty.

Faculty research at Aalto BIZ represents a broad spectrum of interests and research methods in the areas of financial and management accounting. The emphasis of research in financial accounting is on financial reporting and analysis, broadly defined. Recent research addresses various topics in international accounting (IFRS), auditing, and corporate governance. Research in the field of management accounting focuses on cost management, management control systems, performance measurement, and capital investment decision making. Recent research topics include, for example, the use and role of management accounting information in the Finnish healthcare sector.

**Degree requirements**

**Common studies 12 ECTS**

Common studies are listed on [Common core studies](#).

**Specialization area studies 48 ECTS**

Specialization area studies (48 cr) include Common studies in specialization area (business) (12cr) and Disciplinary studies (Accounting) (36 cr).

**Disciplinary studies in Accounting 36 ECTS**

**Methodological Requirements and Recommendations**

Students wishing to pursue doctoral studies in accounting at Aalto BIZ are expected to have taken methodological courses already in their master’s level studies. In addition, depending on their specific research area, students are recommended to take at least one advanced course on quantitative or qualitative research methods in their disciplinary studies (see item 3 above).

**Complementary Studies in Accounting**

Doctoral students with a non-accounting major for their master’s degree are obliged to complement their studies by taking at least three optional master’s level courses in accounting offered by the Aalto BIZ (18 ECTS credits) and by writing a concise thesis on an accounting topic or writing research papers (12 ECTS credits). These minimum requirements may be augmented on an ad hoc basis depending on each student’s background.
